

Kenneth L. “Kelly” Evans (DIV 03)

The Lake Limerick Water System is undoubtedly the most valuable and essential Association asset. The need for substantial stewardship and long-term planning is essential to maintain and improve our already excellent water supply system. That is why I am seeking a position on the Water Committee.

Last year I was appointed to serve on the Water Committee to fill an unexpired term. During that time, I have been part of committee actions to hire an excellent Water System manager and assistant, evaluate system revenues, support a restructuring of water rates to encourage conservation and manage resources, collaborate with committee members and our CAM in long-range planning, system maintenance and upgrades, and emergency repairs.

Extensive experience with pumping/hydraulics, personnel hiring/management, long-range planning, and fiscal conservancy, as well as the ability to work collaboratively with committeemembers, LLCC employees, and community members are some of the skills I bring to the committee. I am a member of the Lake Dam Committee and have previously served on the LLCC Board of Directors. My wife, Cyndi, and I have owned property at Lake Limerick since 2008 and have been permanent residents since 2018.

I am committed to helping the Association, and the Water committee in particular, meet the growing demands placed on our aging infrastructure. To that end I ask for the privilege of your vote.
