

Jerry Young

Declaration for Board of Directors

I've owned two homes and a few properties in Lake Limerick since the early 1990's. I've always enjoyed being part of Lake Limerick's small community, especially enjoying the lakes and the great neighbors. I'm an avid walker and take advantage of our quiet location.

I'd like the possibility of serving on the Board. It would be a privilege and allow me the chance to give back to the community. My goals are to help it stay strong now, and for all the families who will come in the next decades. Especially our infrastructure.

My professional background is in heavy construction, primarily as a crane operator. Operating heavy equipment has been a large part of my work history and I'm proudly a longtime member of Operating Engineers International Local 3 (union).

I've been a job foreman and superintendent. Project and construction management is my specialty. For example, I worked for 6 years at Washington state's Grand Coulee Dam, and I bring a wealth of experience in facilities work at water treatment plants. I think this will be a strength for the Board because supporting the Water system, alongside its committee, is a hope of mine.

I have worked from SE Alaska to southern California. Though I've enjoyed many wonderful places and met amazing people, I've always looked forward to my returns to my home at Lake Limerick, with its beauty and community.

Nothing quite compares to my life here at Lake Limerick.

Thank you for your consideration,

Jerry Young
