

GREENS COMMITTEE MINUTES

JULY 7, 2020

Members Present: Vern Duggan, Gary Yando, Mary Lou Trautmann, Nadine Dunning, Lance Levine, Jerry and Sheila Nokes

Guest: Dick Getchel, Steve Sayler Stacie Stoney, Lesley R Mosely, Joe and Michele Johnson

Leonard and Cindy Gaaney, Dean Dyson, Brian Smith

Staff: Roger Milliamn, Jason Howerton, Elen Gaschet, Mark Henricks

Meeting called to order and guest welcomed.

Greens Report: See attached

Pro Shop: Elen sent a shout out to the staff and volunteers running the golf camps. Several kids and adults have signed up for another successful event. Golf ad is now running in the Shelton Journal. We have a nice article in the Fjord magazine. All round sales are good.

Cam: congrats to the crew for 2% increase in revenue over last year. #5 restroom is going to be under construction to correct the plumbing issue. A new port a potty will be brought in to help the situation. AAA will start pumping the port a potty's twice a week beginning this week.

Marketing: Restaurant and Café voiced concern over member behavior. The Governor has instated you must wear a mask when entering a business. No exceptions. If you have a medical issue you need to let the server know right away. The new policy of No Mask No service is being implemented and new signage posted.

Chair: Course is doing great and lessons are a hit. It is good to see so many participating.

Navy: We are working on our water rights issue. Navy and our attorneys are working together on the issue. We will be paying the admin fee to start communication. The BOD asks the Greens to make a plan of what is really necessary moving forward and bring that information to the Board before its meeting Saturday.

Scott Elkhorn has resigned from our committee and Nadine will be leaving us by summers end to move to AZ fulltime. We wish her good travels.

Other Issues: the topic of walkers on the golf course was brought up by several members present. With the closure of the golf course due to the Covid outbreak many members started using the golf course for exercise. Now that the course is open again the issue of safety has

come up. A Sub Committee will meet to go over the rules for walkers and golfers and will bring back to the committee what is finalized. This is not a one and done topic and we will have to work through the issue. There was a long discussion with many opinions.

Motion to adjourn was made by Lance Levine and second by Mary Lou Trautmann.

Respectfully submitted by Sheila Nokes

GREENS REPORT 7/7/2020

MARINERS

OPEN IN HOUSTON 7/24

The course is still in very good playable condition right now, the wind has dried out a few areas here and there, but that is very normal for this time of the year.

My crew and I have been working hard maintaining the course the best we can while course has been extremely busy, which is a good thing. The course will always tell you how much it is being played. You will notice the walkup areas to greens and tees getting a little more stressed from compaction, areas where golf cart traffic go on and off cart paths show their stress spots as well. But all in all it's always nice to see the course being played.

I had the opportunity to golf several other courses last month, including 3 rounds here with my boy. It gave me the chance to compare how great of shape our course is in compared to theirs and also to see what practices work for them that I might include here to make our course even better.

Please understand that we are a small crew with 40+ acres to maintain. We do the best we can and strive for greatness. We ask that everyone be kind and courteous to one another, also please don't approach staff in any inappropriately way. Remember were all in this together during this stressful time.

THINGS TO DISCUSS: AKA HOT TOPICS.

- #5 Restrooms: Been some plumbing problems going on with these two restrooms and its far from what our maintenance person can handle. It has been noticed of too much TP and along with feminine products are being flushed down the toilet. A plumber has been called and will be fixed shortly. Sorry for the inconvenience. In my opinion, I think the whole plumbing design needs to be corrected, maybe we contract it out during the winter time. If it happens again, we will look into a portable around that area.
- #3/#9 Porta-potty: This gets serviced every Tuesday, but with #5 out of order, I have already made the call to AAA to get serviced more often than once a week.
- The culvert on #7 under the fairway needs to be replaced. It's too small for the amount of rain water it takes on. Looking into fixing it just before October rains hit.

- The easy up cups will need a little more maintenance done to them, the hole that the wire slides up through is too small in my opinion, I played another course that uses them and they drilled the whole out bigger, seems to work better.
- We do our best to move pin locations, cart signs, and tee markers more often this time of year because of the amount of play. I have stressed to my crew to be fair and even more fair on the weekends. Please bear with us, no need to go postal when finding out we placed a pin in a tough area.

That's all for now, keep smiling and swing hard in case you hit something!
