

## **Kenneth L. "Kelly" Evans Lake Limerick Water Committee Candidacy Statement**

The Lake Limerick Water System has been described by members at a recent BOD meeting as the lifeblood of our HOA- "no water, no HOA." I concur. It is our most valuable asset, and the need for careful stewardship and long-range planning has never been more paramount. That is why I am running for re-election to the LLCC Water System Committee.

I am currently in my second year of serving as the committee chair. During this time our dedicated committee has seen it that many system repairs and upgrades have been planned for and accomplished including bringing Well #2 back online, completely updating the 10-year Water System Plan (WSP), securing a highly qualified and experienced water manager, purchasing a much-needed backhoe in collaboration with other HOA departments, and successfully helping to negotiate a settlement with the U.S. Navy to replace our water line along Mason Lake Road saving LLCC in excess of \$221,000.

I am proud of these and other committee accomplishments, and I eagerly anticipate future system improvements to help guarantee the highest quality water for decades to come. I remain committed to helping the HOA and Water System Committee meet the growing demands placed on our aging infrastructure through careful planning and equally careful resource spending. To that end, I ask for the privilege of your vote in April.
