

WILDFIRE PROTECTION

Lake Limerick is at some risk of experiencing a wildfire as most of us know. Many remember the 4th of July fire that happened a couple of years ago along McEwan Prairie Road. With the warming and drying climate in mind, the Greenbelt Committee wants to give our members ways to help protect their properties and homes. The more members take these precautions the safer we all may be. Please take the enclosed flyer from FIREWISE USA to heart and clear the five-foot area near your home of plants and potentially flammable debris to make it less vulnerable to fire. Additional information can be found from the NATIONAL FIRE PROTECTION ASSOCIATION and from the DNR WILDFIRE READY NEIGHBORS program (1-877-WA-READY) (WildfiReady@dnr.wa.gov) Upon your request, this program will send a member of the Mason Conservation District staff to your home to evaluate your property and make suggestions to help make it safer in the event of a wildfire. Let's work together to keep our community safer.
