

MASON

CONSERVATION DISTRICT

Caution

Mason Conservation District will be conducting herbicide treatment.

Glyphosate will be applied under permit to control the noxious weed(s): **Invasive Knotweed.**

Pre- and Post Treatment signs will be posted at location.

Treatment will occur: 10/7/2026

Please stay clear of the area behind the signs for 48 hours after treatment date.

Knotweed has spade or heart shaped leaves, bamboo-like stalks, and small white flowers. Please do not cut or disturb this plant as it will easily spread. Treated knotweed leaves will turn yellow and fall off the plant.

For more information about this treatment, contact: Mason Conservation District 360-427-9436
